

PRODUCTION & ARTIST PORTFOLIO

Murals & Public Art Experience

I have many years of on-site experience as a production lead/manager with over 300 productions for festivals, production companies, and high-calibre artists. I bring a deep understanding of what it takes to bring complex projects to life. I excel at coordinating teams, schedules, and resources to ensure seamless execution from concept to completion.

My attention to detail and strong problem-solving skills keep me engaged at every stage of production, enabling both myself and if required assistants to deliver high-quality work efficiently and on time. I also maintain a broad network of collaborators, from artists to production leads, which allows me to assemble the right team for any project. I am accustomed to wearing many hats, and I thrive in dynamic environments where adaptability is key.

As an artist and educator I've completed many murals of various sizes, complexities and requirements. The last several years, I've have been the go to artist when festivals and production company have a last minute request and need a fast turn around. In viewing my website you will notice my many collaboration with high end clients from Osheaga to the Montreal Jazz festival, from the Montreal Canadiens to Municipalities and school boards.

The last several years I have focused on helping others produce world class art, now I'm working on my art career and moving forward in bringing my many years experience to the next level.
